

Serene Sound

The Sound of Serenity
in the MRI

Concert-Quality Audio System

The Serene Sound digital audio system offers vivid, immersive sound that brings entertainment to life in the MRI environment. With Serene Sound, patients are soothed with crystal-clear highs and deep, rumbling lows – all in spectacular high fidelity. Serene Sound is the only MRI-compatible product to use speakers in the headset to enrich sound and bring a new dimension of relaxing audio entertainment into the MRI environment. Treat your patients to the highest quality audio experience and ensure a competitive advantage for your MRI facility.

Serene Sound Features Include:

- Two-way patient intercom with active noise-cancellation microphone
- 30dB headset that reduces MRI gradient noise
- 500Hz - 10KHz frequency response
- Dual volume control – adjustable by both patient and technologist
- Talk button fades out music and enables microphone
- Multi-functional remote control
- A LaserLink dual-optical fiber connection to transmit audio signal from the console to the MRI suite
